SECOND GLOBAL

SS INNOVATIONS MULTI-SPECIALITY ROBOTIC SURGERY CONFERENCE

Date

7-9 March 2025

Venue

THE LEEA AMBIENCE

National Highway 8, Ambience Island, DLF Phase 3, Sector 24, Gurugram, Haryana 122002, INDIA

About the conference

SS Innovations is delighted to announce the "Second Global SSI Multi-Speciality Robotic Surgery Conference (SMRSC) 2025," a pioneering platform to explore cutting-edge advancements in robotic surgery with the revolutionary "SSI Mantra 3" Surgical Robotic System. Building on the remarkable success of SMRSC 2024, which brought together leading minds to discuss and showcase transformative innovations, this year's event promises to elevate the dialogue further.

SS Innovations continues its commitment to transforming healthcare across specialties like Urology, General Surgery, Gynecology, Head & Neck, and Cardiothoracic surgery.

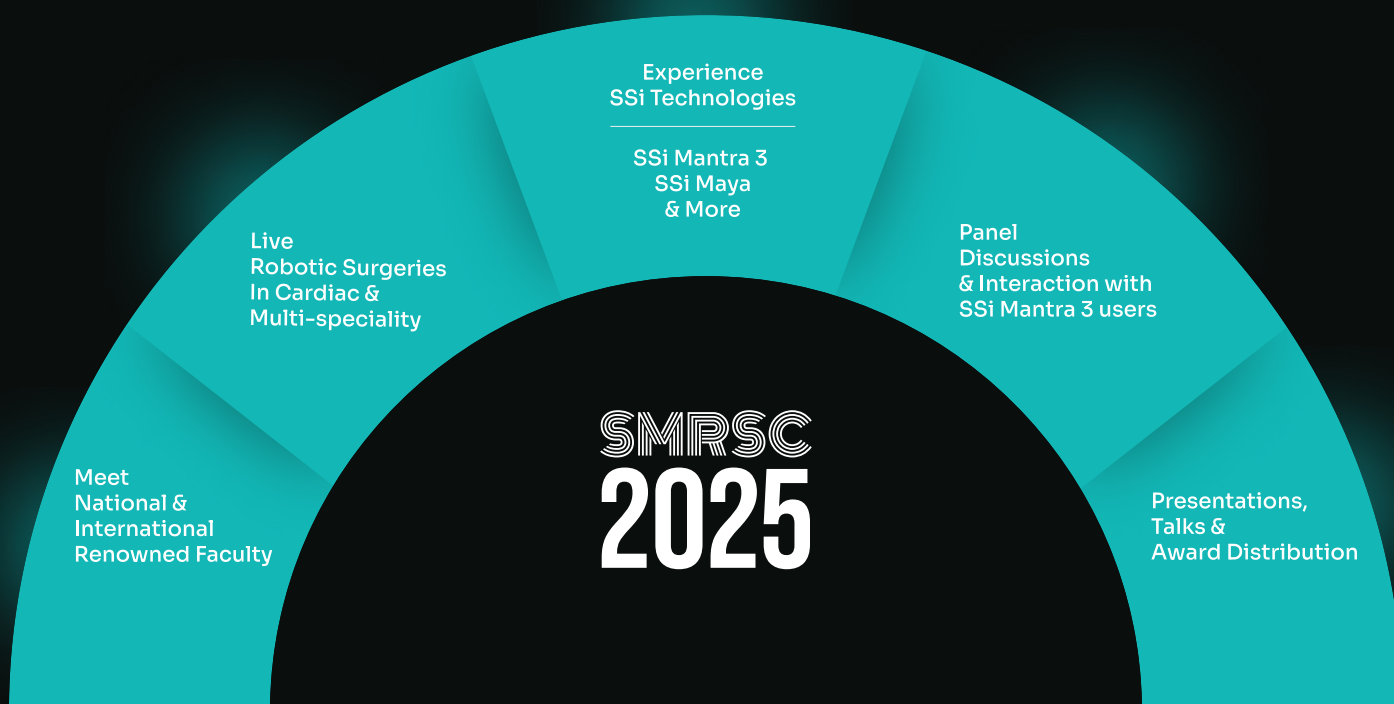

Scheduled from the 7th to the 9th of March 2025, at The Leela Ambience Hotel, Gurugram, Haryana, India, SMRSC 2025 is poised to bring together an esteemed gathering of global medical experts, technologists, and visionaries. This event will spotlight the future of robotic surgery, emphasizing the advanced capabilities of the SSI Mantra 3 system.

The conference will host prominent National and International Faculty, presenting scientific sessions on the evolution of robotic surgery, the role of Artificial Intelligence, and the promise of sustainable tele-surgery. Attendees will witness live surgeries performed with the SSI Mantra 3 system, showcasing its versatile applications across multiple specialties, including cardiac surgery, while gaining invaluable insights and hands-on learning opportunities.

Highlighted themes include innovations in robotic surgery, enhanced capabilities of the SSI Mantra 3 system, the integration of AI in surgical practices, and the expanding potential of tele-surgery. Special focus will also be given to groundbreaking developments in multi-specialty and cardiac robotic procedures.

SMRSC 2025 aspires to drive collaboration, inspire innovation, and facilitate knowledge-sharing among global thought leaders, practitioners, and industry pioneers. This conference aims to redefine the future of surgical care, with the SSI Mantra 3 system at its core.

We invite you to join us for this transformative event that will shape the next chapter in robotic surgery for 2025 and beyond.

Dear Friends and Colleagues,

It is with great pleasure that I extend a warm invitation to you for the Second Global Multi-Specialty Robotic Surgical Conference (SMRSC 2025), which will be held from March 7-9, 2025, in Gurugram, within the Delhi National Capital Region (NCR). Following the success of our inaugural conference in 2024, we are excited to gather once again to showcase the advancements in robotic surgery, with a particular focus on the SSI Mantra 3 System.

The SSI Mantra 3 continues to revolutionize surgical robotics, combining cutting-edge technology with unmatched precision, and accessibility. Installed in over 70+ hospitals worldwide, the SSI Mantra has successfully facilitated over 3000+ multi-specialty surgeries, including complex cardiac procedures.

At the conference, we will feature live surgeries across various specialties, including General Surgery, Gynecology, Urology, Thoracic Surgery, and Cardiac Surgery. These surgeries will be performed by our distinguished faculty, who will demonstrate the versatility and performance of the SSI Mantra 3 System in real-world surgical settings.

We are honored to have renowned National and International faculty members who will not only moderate live surgeries but also deliver insightful presentations on their experiences with the SSI Mantra 3. Surgeons from India and abroad, who have implemented the SSI Mantra 3 in their practices, will share their knowledge and findings across a spectrum of specialties.

Additionally, we will introduce you to groundbreaking technologies, including tele-proctoring, tele-surgery, and our SSI Maya division, which integrates virtual and mixed reality to enhance surgical education and planning.

Gurugram is a wonderful destination at this time of year, offering pleasant weather and a wealth of cultural and historical sites to explore. The conference promises to be a valuable opportunity for collaboration, knowledge sharing, and exploring the future of robotic surgery.

We look forward to welcoming you to the SMRSC 2025 and continuing to advance the field of robotic surgery globally.

Thank you very much.

SMRSC 2025

SECOND GLOBAL
SSI INNOVATIONS MULTI-SPECIALITY
ROBOTIC SURGERY CONFERENCE

WHO WILL BENEFIT

The SS Innovations Multispeciality Robotic Surgery Conference (SMRSC) 2025 is designed to benefit a wide range of professionals and stakeholders in the field of robotic surgery. Potential beneficiaries include:

Surgeons and Medical Professionals: Surgeons specializing in various disciplines, including cardiac surgery and multi-speciality procedures, will gain insights into the latest advancements and techniques in robotic surgery. The event provides a platform for skill enhancement, exposure to innovative technologies, and networking opportunities.

Healthcare Administrators: Professionals involved in healthcare administration can benefit from understanding the potential impact of robotic surgery on hospital operations, resource management, and patient outcomes. Insights gained from the conference will inform strategic decisions related to technology adoption and healthcare delivery.

Researchers and Innovators: Individuals involved in research and development within the field of medical robotics will benefit from exposure to cutting-edge technologies and methodologies. SMRSC may serve as a hub for collaboration, idea exchange, and potential partnerships to drive future innovations in robotic surgery.

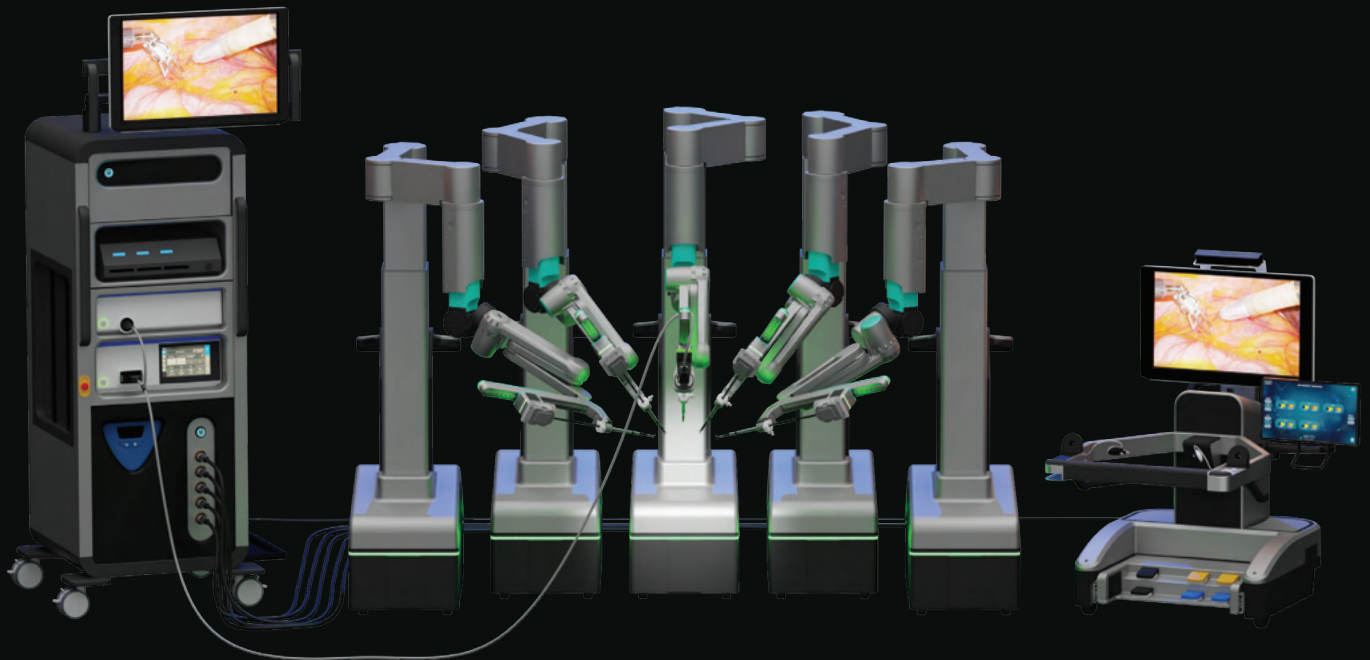

Students and Trainees: Medical students, residents, and trainees interested in surgical specialties have the opportunity to learn about the latest advancements in robotic surgery. The conference will provide valuable educational experiences, exposure to real-time surgeries, and networking opportunities with experienced professionals.

Overall, SMRSC aims to foster collaboration, education, and innovation within the field of robotic surgery, benefiting a diverse audience of healthcare professionals, researchers, industry representatives, and ultimately, the patients they serve.

The SSI Mantra 3, an advanced robotic surgery system by SS Innovations, sets new standards in minimally invasive surgical care. Proudly Made in India, this state-of-the-art system combines cutting-edge technology with cost-effectiveness, revolutionizing robotic surgery for healthcare professionals worldwide.

At SMRSC 2025, multiple SSI Mantra 3 systems will be available for interactive demonstrations, showcasing their innovative features. This includes teleproctoring and telesurgery capabilities, enabling real-time guidance and remote surgical interventions, further enhancing accessibility and collaboration in surgical care.

Experience the SSI Mantra 3 and explore how it is shaping the future of robotic-assisted surgery.

**PROUDLY
MADE IN INDIA
FOR THE WORLD**

SSI Mudra endosurgical instruments, is designed to deliver precision and dexterity across multiple specialties. With over 45 different types of instruments, SSI Mudra enables surgeons to perform various procedures with enhanced control and accuracy. This versatile range of instruments ensures seamless integration with the SSI MUDRA SSI Mantra system, contributing to superior surgical performance and improved patient outcomes.

**ADVANCED
ROBOTIC
INSTRUMENTS**

An advanced extended reality platform that revolutionizes surgical training and procedure optimization by harnessing the power of Mixed Reality and AI. Designed to offer immersive virtual and augmented reality experiences for peri-operative procedures.

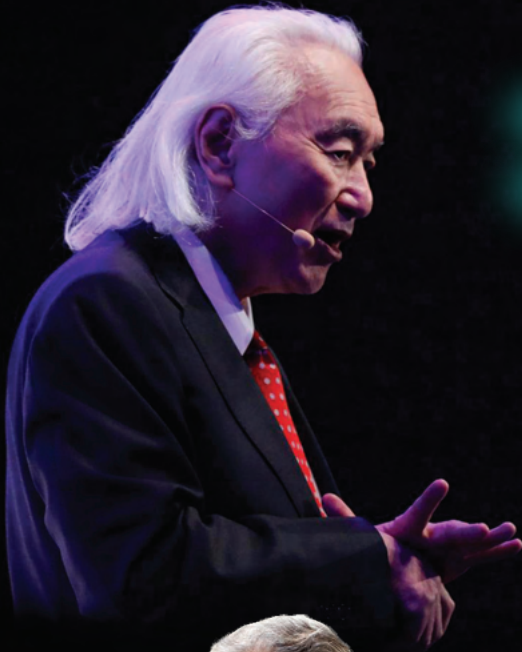

SSI Guru

Developed by SSI Maya, SSI Guru is a revolutionary tele-proctoring app designed to improve surgical training and support. The app features tele-illustration, offering a live 3D endoscopic view and real-time voice communication between surgeons and proctors. In addition, SSI Guru supports modules for patient reports, DICOM images, and more, facilitating enhanced remote proctoring and guidance for complex procedures.
